

Sebastian Parkin

+447518800032 | sebparkinwork@gmail.com | <https://github.com/sebparkin>

Software Developer with experience building full-stack applications using Python and React, and a background in scientific computing and machine learning. Experienced in developing scalable software, and translating complex technical concepts into practical solutions. Motivated to contribute to ambitious teams working on impactful real-world problems.

WORK EXPERIENCE

Software Developer, Diegesis Ltd. September 2025 – Current

- Worked on an application which converts legacy database systems to a modern frontend and modern backend using a custom built and trained AI model.
- Manage and create software for the Office of National Statistics (ONS) database.
- Programming in C, bash, Python and 4GL.

Peer Review Manager, Editorial Office Ltd. December 2023 – September 2025

- Read and digest complex scientific papers for BMJ Open.
- Note down the scope of the paper and use this information to find potential reviewers.
- Recently liaised with the Prophy team to test a new AI reviewer searching system.

TECHNICAL SKILLS

- **Languages:** Python, C, Bash, SQL, 4GL
- **Data and Machine Learning:** NumPy, Pandas, PyTorch, TensorFlow, scikit-learn
- **Frontend:** React, Expo
- **Tools and Infrastructure:** Docker, Kubernetes, Git, Streamlit
- **Data Analysis:** matplotlib, seaborn

PERSONAL PROJECTS

Stock Trading bot (PyTorch + Streamlit):

- PyTorch LSTM Model trained on AAPL and MSFT data from the Yahoo finance API.
- Full integration with Alpaca trading API and a Streamlit dashboard, hosted with Oracle Cloud.

Frontend Development (React / Expo):

- Built a nonogram puzzle game with React including custom image importing functionality.
- Implemented interactive grid rendering and touch gesture handling.
- Designed and managed component-based architecture with component animation.

EDUCATION

MSc Scientific Computing and Data Science, University of Bristol, Distinction 2024 – 2025

- Received 78% on my molecular dynamics of the epidermal growth factor receptor thesis.
- Software engineering, high-performance computing, and artificial intelligence.

BSc Pharmacology, The University of Bristol, First Class Honours 2020 – 2023

- Received the R. B. Barlow award for the highest research project grade in my cohort (82%).
- Extensive knowledge on receptor, ion channel, and nervous system pharmacology.

Poole Grammar School 2014 - 2018

- A levels: A* in Maths, Physics, Chemistry

INTERESTS

- Personal programming projects to teach myself new languages and techniques.
- Organising surf trips, involving swell charts analysis.
- Producing electronic music and DJing, requiring self-discipline and motivation.
- Scuba diving with a PADI open water diving qualification.
